## Eighth Annual Sustainability Summit goes virtual in 2020 to highlight green initiatives and resource recovery

Public enthusiasm and support for environmental sustainability continues to grow every day. Responsive local governments, organizations and others are developing programs and processes that utilize local resources, save money and improve the environment. Attend our 8th Annual Sustainability Summit to learn about free and low-cost resources available for your community. **This year, the MWRD is hosting this event virtually and opening it up to the general public.**

**Free Registration!**

- Hear success stories from industry experts and community leaders.
- Discover how green infrastructure can help improve water quality and prevent flooding.
- Learn how biosolids can improve your turf quality and reduce your carbon footprint.

The MWRD is accepting applications from Cook County individuals, organizations and businesses for its 2020 Sustainable Landscaping and Biosolids Beneficial Reuse Awards. Visit [mwrdr.org](http://mwrdr.org) for details and to apply. **Deadline: Sept. 15.**

**Join us!**  
Wednesday, Oct. 21, 2020 • 10 a.m. – Noon

**TO REGISTER, VISIT [MWRD.ORG/SUSTAINABILITY-SUMMIT-RSVP](http://MWRD.ORG/SUSTAINABILITY-SUMMIT-RSVP).**

 Metropolitan Water Reclamation District of Greater Chicago 

**WHO:** The Metropolitan Water Reclamation District of Greater Chicago (MWRD) and partners

**WHAT:** The MWRD's Sustainability Summit will recognize resource recovery efforts and green initiatives the MWRD and stakeholders are taking to protect and manage the water environment. The Summit is designed to equip and empower partnering municipalities and environmental advocates with the latest trends in sustainability and educate the public on the work of the MWRD. To register, visit <https://mwrdr.org/form/sustainability-summit-2020-rsvp>.

**WHERE:** This year's Sustainability Summit will be held virtually using Microsoft Teams.

**WHEN:** Wednesday, October 21, 2020 at 10 a.m.

The MWRD's Eighth Annual Sustainability Summit will highlight emerging programs in resource recovery and stormwater management and offer an educational forum for those who are interested in utilizing renewable resources. Viewers can gain a better understanding of the benefits of using sustainable resources like the MWRD's

EQ Compost and EQ Biosolids and learn about green infrastructures to combat flooding and improve water quality. The Sustainability Summit will cover sustainable landscaping methods and introduce ways to help Illinois restore the monarch butterfly population. The MWRD and partners will also discuss how they have (*continued*)

## **Eighth Annual Sustainability Summit goes virtual in 2020, *cont.***

enlisted goats and sheep to improve vegetation control at water reclamation plants, and how a revitalized Chicago Area Waterway System is now home to an increasing population of native fish.

Experts will share their tips, best practices, and success stories. Speakers include MWRD Board President Kari K. Steele, MWRD Senior Environmental Soil Scientist Theresa Johnston, Ph.D., MWRD Assistant Civil Engineer Paul Jacobs, Klaudia Kuklinska of the Energy Resources Center at the University of Illinois at Chicago, MWRD Maintenance Manager Aruch Poonsapaya, Ben Robel, of Vegetation Solutions, MWRD Aquatic Biologist Dustin Gallagher and Dr. Austin Happel of the Daniel P. Haerther Center for Conservation and Research at Shedd Aquarium.

In addition to providing an outlet for sharing strategies and resources in promoting the environment, the

Summit will honor individuals, organizations, municipalities and other agencies for modeling best practices in sustainability. The MWRD will recognize projects from across Cook County that speak to the MWRD's mission in renewable resources, flood control and water quality improvements. The awards also spotlight the best examples of innovations in green infrastructure and sustainable landscaping practices and MWRD biosolids use. The MWRD's EQ Biosolids and EQ Compost are a product of the MWRD's treatment process. In addition to improving turf quality as a soil amendment or conditioner for establishing turfgrass and for mixing into custom topsoil blends, the local use of biosolids can also reduce carbon footprints. For more information about the Sustainability Summit, visit <https://mwrld.org/8th-annual-sustainability-summit-0> or contact (312) 751-6633 or email [public.affairs@mwrld.org](mailto:public.affairs@mwrld.org).
