Dear Mr. Keller:

Subject: Hanover Park WRP - IEPA Permit No. 2007-SC-2951, Monitoring Report for April, May, and June 2008

The attached report includes nine tables of the monitoring results for the Hanover Park Water Reclamation Plant Fischer Farm site for the second quarter of 2008.

Very truly yours,

Louis Kollias

Director

HANOVER PARK WATER RECLAMATION PLANT FISCHER FARM REPORT FOR SECOND QUARTER OF 2008	1

FOREWORD

The data and information in this report fulfill the frequency of monitoring and the reporting requirements for the Hanover Park Fischer Farm Site as specified in the Illinois Environmental Protection Agency Permit No. 2007-SC-2951 for the second quarter of 2008.

LIST OF TABLES

ACKNOWLEDGMENT

The assistance given by Ms. Minaxi Patel, Sanitary Chemist I, of the Environmental Monitoring and Research Division, and Mr. John Chavich, Sanitary Chemist IV, of the John E. Egan Analytical Laboratory Section, is greatly appreciated.

DISCLAIMER

Mention of proprietary equipment and chemicals in this report does not constitute endorsement by the Metropolitan Water Reclamation District of Greater Chicago.

HANOVER PARK WATER RECLAMATION PLANT FISCHER FARM REPORT FOR SECOND QUARTER OF 2008

During April, May, and June 2008, activities at the Hanover Park Water Reclamation Plant (WRP) Fischer Farm included well and field drainage water sampling, and flow measurements. These monitoring activities are required by the Illinois Environmental Protection Agency Operating Permit No. 2007-SC-2951. Fields and water monitoring locations are presented in Figure 1.

Water from each of the six monitoring wells was sampled twice monthly in April, May, and June. Analytical data for samples collected during the quarter are presented in Tables 1 through 6.

Drainage water (combined surface and subsurface) returned to the Hanover Park WRP from the farm fields was sampled twice per month in April, May, and June. Analytical data for these samples are presented in Table 7. The volumes of drainage water returned to the WRP during the second quarter were estimated as 12.14, 5.04, 3.80 million gallons in April, May, and June, respectively. The analytical data for the lagoon supernatant are presented in Table 8. The volumes and dry weights applied are reported in Table 9.
