

**Document 10.1 – Operational Control Guidance**

Version Number: 1  
 Version Date: October 13, 2011

The operational controls of the critical control points will:

1. Include standard operating procedures (SOPs) or any other type of operational control (e.g. permits, ordinances, process controls, monitoring activities, checklists, etc.).
2. Be developed and implemented at all critical control points throughout the biosolids value chain to effectively manage potential environmental impacts.
3. Incorporate all legal and other requirements.
4. Consider applicable best management practices.
